## Water Use and You

### Directions:

Think about the water you and your family use in a day. Estimate how many gallons are used for each activity below. Be honest! Then add it up.

Activity	Gallons Used	Times/Day	Total Gallons
Brushing teeth (water left on)	2 gallons	_____	_____
Shower or bath (10 minutes)	25 gallons	_____	_____
Toilet flush	3 gallons	_____	_____
Dishwasher	6 gallons	_____	_____
Washing hands	1 gallon	_____	_____
Drinking water	0.5 gallon	_____	_____
<b>Total Estimated Gallons You Use Per Day:</b>		_____	<b>gallons</b>

### Discussion:

1. Which activity used the **most** water?
2. What could you do to **save water** in one of these activities?
